

The Master Scuba Course is for divers who want to further their understanding and enjoyment of diving. This is an intensive program, usually consisting of about 20 hours of academics plus the application of this acquired knowledge in a schedule of at least eight dives. The information presented in the academic session will increase your knowledge of equipment, the environment, physics, physiology and decompression. Upon completion of the course you will be qualified to handle new diving circumstances and engage in more diving activities. This course is an excellent progression towards NAUI leadership courses.

A pre-requisite for this course is an Advance Scuba Diver certification with a minimum age of 15 years and your own basic gear.

During the eight qualifying dives you will do the following required dives:

- Emergency procedures and rescue
- Deep / simulated decompression dive
- Night or low visibility dive
- Navigation dive
- Search and recovery – light salvage

And three of the following elective dives

- Skin diving
- Review of basic scuba skills
- Environmental study or survey
- Air consumption (practical)
- Boat diving
- Shore diving
- Special interest dive

Most of the dives are done at the coast, but some will be done at Bass Lake or Miracle Waters in Gauteng. The course price **EXCLUDES** the cost of the actual weekend away and the cost of the dives.

Included in the course are the textbook and certification fees. The BCD, regulator and cylinder can be rented from the school. You need your own swimming suit, towel, wetsuit, fins, mask, snorkel and weight belt.
