

RESCUE DIVER COURSE

The Rescue Course trains divers in the knowledge and skills needed to manage risks and to effectively handle limited water problems and diving emergencies.

The course consists of approximately 6 hours of academic, 10 hours of practical training, 1 pool session and two dives.

A pre-requisite for this course is a Scuba Diver certification with a minimum of 15 years and a first aid and CPR certification.

The practical dives will be done at Bass Lake or Miracle Waters in Gauteng. The course price **excludes** the cost of the actual weekends away and the cost of the dives.

Included in the course are the textbook and certification fees. The BCD, regulator and cylinder can be rented from the school. You need your own wetsuit, fins, mask, snorkel and weightbelt.
